

Internet

Virtual1
Total network freedom

Patience is not a virtue. A slow internet connection is not only extremely frustrating, but it also reduces the productivity of the workforce – costing time and money. Virtual1 offers the ideal solution: a business-grade internet service designed to answer the needs of your customers.

Business-grade internet

The internet has over 1 billion users; ensuring a fast, consistently available service for your customers can therefore be challenging. But Virtual1's high speed, reliable and scalable internet connectivity rises to the challenge. With speeds from 2Mb up to 10Gb, and access available via both DSL, SDH and Ethernet, we enable you to deliver the right solution to answer your customers' needs.

Robust, reliable and fast

By combining the networks of five Tier 1 ISPs, Virtual1 can deliver a highly resilient service which guarantees the fastest connection available at any time. What's more, there is no single point of failure – if any of the individual routes should go down, traffic is automatically re-routed to ensure that your customer's business stays connected at all times.

MPLS Internet breakout

Virtual1 can deliver Internet breakout for any managed or unmanaged MPLS solution. This means your customer can breakout directly from the core and utilise the Virtual1 managed firewall service. By having a centralised Internet breakout, your customer can avoid a single point of failure for their internet, can benefit from economies of scale and can enjoy the flexibility of immediate expansion.

Ongoing technical and customer support provides added peace of mind.

Virtual1: Total network freedom

Virtual1 offers its partners the freedom to build and manage the ideal local, national or global network for their customers. As an independent wholesale aggregator, we deliver connectivity solutions – from DSL through to complex MPLS – exclusively to the Channel.

Our interconnects with the leading UK and global carriers provide access to more than 230 countries and territories using the most technologically advanced networks available.

We understand that every customer has different needs, so our solutions are individually tailored; and with multiple access methods available, our Partners connect any time, anywhere, using just 1 supplier and 1 Service Level Agreement.

Find out how you can build your ideal network: call us today on 0844 884 0800 or visit www.virtual1.co.uk
